

Kinetic Notes - 10/4/2009

- Welcome and thanks
- Emergencies always take priority. If you have an emergency situation ... at the first opportunity say "Break, this an emergency". We will deal with your emergency before anything else. If you hear an emergency, stand by with all other transmissions until the emergency is concluded.
- Atomic clock here to sync your watch. Normally just use the time to the nearest minute. If you have two racers very close together use seconds to distinguish which order they are in.
- Write down the time on your timer sheet and then transmit it. Do not try to keep times in your head.
- We will use Tactical Calls. i.e. "This is Segment 2 finish" or "this is Segment 4 start". Don't forget to make your last transmission in a series of transmission a legal ID..."This is Segment 3 start, KE7ABC, clear"
- Net control will use tactical call: Race Control
- If you are not at your assigned location, use where you are as the tactical call. i.e. "this is Water and Kearney. We have a request for a kinetic kop to come to this location." Again your final transmission should be a legal ID..."This is Water and Kearney, KE7XYZ, clear".
- It's important that your shirt be seen during the time the racers are actually near your location.
- You are welcome at the American Legion where Race Control is located. There is a party there after the race.
- Check your radios. HAVE FUN!!!
